OUR MISSION IS TO INTRODUCE HIGH SCHOOL STUDENTS TO COMPUTER SCIENCE AND GIVE THEM THE MEANS AND MOTIVATION TO SUCCEED IN THE FIELD.
High School Academy is a free two week introduction to the field of computer science. Students will learn about such topics as hardware, operating systems, big data, web design, human/computer interaction, natural language processing, artificial intelligence, programming with Java and Python, and mobile application development. Students will also learn about the benefits of being a CS student at Pitt and graduating with a CS degree.
